Hacktivity CTF game winners

Bites of security coding

This year somebody has been working hard to
get their #Hacktivity2016 tickets. The Avatao
team developed a CTF game for the potencial
participants. Everybody can test their skills by
trying offensive and defensive security tasks
by Avatao and had the chance to get acquaint-
ed with the typical bugs and the ways to elim-
inate them in different environments: web,
python, Java, C/C++. The path starts with easy
tasks, difficult ones are included.

We have 6 winners who got free Hacktiviy
tickets and our sponsor also offered gifts for
them which they will get at the closing cere-
mony.

They are the winners:
1. ▓▓▓ Péter
2. ▓▓▓ Sándor
3. ▓▓▓. Dávid
4. ▓▓▓ Tamás
5. ▓▓▓ Olivér
6. Bursa Matus

The gifts offered by our sponsors:

5 books (AdNovum)   AdNovum
- RESTful Java Web Services Security
- The Hacker Playbook 2
- Identity & Data Security for Web Development
- Practical Internet of Things Securit
- Iron-Clad Java
